

CONTENTS

Jihad Asad and Olivia Florea	
Numerical aspects of two coupled harmonic oscillators	5
F. Arabpur, M. Jafarpour, M. Aminizadeh, S. Hoskova-Mayerova	
On geometric polygroups	17
Montassar Barhoumi	
Kohn-Vogelius formulation and high-order topological asymptotic formula for identifying small obstacles in a fluid medium	35
R. A. Borzooei, E. Babaei, Y. B. Jun M. Aaly Kologani and M. Mohseni Takallo	
Soft Set Theory Applied to Hoops	61
Yann Bugeaud and Gülcan Kekeç	
On Mahler's p -adic S -, T -, and U -numbers	81
Gamaliel Cerda-Morales	
Comment On "On some Properties of Tribonacci Quaternion"	95
F. Farshadifar and H. Ansari-Toroghy	
Generalized 2-absorbing submodules	99
Carlos M. da Fonseca and Emrah Kılıç	
An observation on the determinant of a Sylvester-Kac type matrix	111
Alexandru Ionescu and Gheorghe Munteanu	
The warped product of holomorphic Lie algebroids	117
Deguenon Judicael and Alina Barbulescu	
Theoretical observers for infinite dimensional skew-symmetric systems	135
Kahraman Esen Özen, Mehmet Güner and Murat Tosun	
A Note on the Acceleration and Jerk in Motion Along a Space Curve	151
Luca Sabatini	
Estimates of the Laplacian Spectrum and Bounds of Topological Invariants for Riemannian Manifolds with Boundary II	165

Nabil Saouli and Fairouz Zouyed	
A modified Tikhonov regularization method for a class of inverse parabolic problems	181
Manuel González-Sarabia, Delio Jaramillo, and Rafael H. Villarreal	
On the generalized Hamming weights of certain Reed-Muller-type codes	205
Azam Adineh Zadeh, Morteza Norouzi, and Irina Cristea	
The commutative quotient structure of m-idempotent hyperrings .	219
