

CONTENTS

Nazi Abachi and Shervin Sahebi On the metric dimension of a total graph of non-zero annihilating ideals	5
Muhammad Ahsan, Zohaib Zahid, Sohail Zafar Edge metric dimension of some classes of circulant graphs	15
Ramzi Alsaedy, Abdeljabbar Ghanmiz and Abdelwahab Dhiffi Nonlinearities on particular elliptic curves subspaces and applications	39
Hamid EL Bahja Hölder continuity of singular parabolic equations with variable nonlinearity	51
Grigore Călugăreanu, Horia Pop Jacobson's Lemma fails for nil-clean 2×2 integral matrices	83
Özgür Erdag, Ömür Deveci, Anthony G. Shannon Matrix manipulations for properties of Pell p-numbers and their generalizations	89
Velusamy Kavitha, Mani Mallika Arjunan and Dumitru Baleanu Controllability of nonlocal non-autonomous neutral differential systems including non-instantaneous impulsive effects in \mathbb{R}^n	103
Harald Köstler, Marco Heisig, Nils Kohl, Sebastian Kuckuk, Martin Bauer, Ulrich Rüde Code generation approaches for parallel geometric multigrid solvers	123
J. Pavan Kumar and P.Venkata Subba Reddy Algorithmic Aspects of Some Variants of Domination in Graphs ..	153
G. Muhiuddin Intersectional soft sets theory applied to generalized hypervector spaces	171

Burcu Nişanci Türkmen and Ergül Türkmen	
δ_{ss} -supplemented modules and rings	193
Sajad Ranjbar	
The modified Ishikawa iteration process with errors in CAT(0) spaces	217
Željka Milin Šipuš, Ljiljana Primorac Gajčić and Ivana Protrka	
Null scrolls with prescribed curvatures in Lorentz-Minkowski 3-space	229
Andromeda Cristina Sonea	
New aspects in polygroup theory	241
Fuat Usta	
Approximation of Functions by New Classes of Linear Positive Operators which Fix $\{1, \pi\}$ and $\{1, \pi^2\}$	255
