

CONTENTS

Khaled Alhazmy, Fuad Ali Ahmed Almaahi, El Mehdi Bouba, and Mohammed Tamekkante On (1,2)-absorbing primary ideals and uniformly primary ideals with order ≤ 2	5
Dorin Andrica, Ovidiu Bagdasar and Michael Th. Rassias On some links between the generalised Lucas pseudoprimes of level k	23
P. D. Beites, A. P. Nicolás, J. Vitória Skew-symmetric matrices related to the vector cross product in \mathbb{C}^7	47
B. L. De La Rosa-Navarro, G. Failla, J. B. Frías-Medina, M. Lahyane and R. Utano On the explicit geometry of a certain blowing-up of a smooth quadric	71
Anamaria N. Emin and Olivia A. Florea Green-Lindsay thermoelasticity for double porous materials	97
Raúl M. Falcón, S. Gowri and M. Venkatachalam Solving the dynamic coloring problem for direct products of paths with fan graphs	115
Velusamy Kavitha, Mani Mallika Arjunan, Dumitru Baleanu and Jeyakumar Grayna Weighted pseudo almost automorphic functions with applications to impulsive fractional integro-differential equation	143
R. Koohnavard and A. Borumand Saeid Residuated skew lattices with modal operator	167
Miroslav D. Maksimović, Svetozar R. Rančić, Marija S. Najdanović, Ljubica S. Velimirović, Eugen S. Ljajko On the torsional energy of torus knots under infinitesimal bending	181

Alexandra Diana Meleşteu	
About the B-concavity of functions with many variables	199
Ana Merkle	
Predictability and uniqueness of weak solutions of the stochastic differential equations	207
Adam Owen and Susanne Pumplün	
The eigenspaces of twisted polynomials over cyclic field extensions	221
Sajad Ranjbar	
Variational inequality for a vector field on Hadamard spaces	241
Bianca Ioana Vasian	
On approximation properties of some non-positive Bernstein-Durrmeyer type operators	251
Shuai Yuan, Yuning Gao	
Normalized solutions of Kirchhoff equations with Hartree-type nonlinearity	271
